Small comment on the attached.

It is a really good letter.

Please change attachment in 2nd doc to enclosure.

Karin,

I had a few suggested edits and a comment on the attachment (attachment 2 here). I'm also including the letter (attachment 1 here) so Marie can see it. I didn't have any comments on that.

The approach and comments the Region has included in the letter and attachment are the ones they notified us about and which we discussed internally a couple of weeks ago. I think their approach is sensible as it allows for soil sampling to take place/not stall while the parties discuss and resolve the outstanding issues with the buildings. In the letter and

attachment, the Region also states that the updated PRG calculator for rad should be used. It is good that they confirm this as it is the updated calculator that EPA has said should be used at sites nationally.

Let me know if you have questions or want to discuss further.

Thanks.

Subject: Request for Review: Draft Final Letter to Navy Re: Hunters Point Naval Shipyard

Importance: High

All,

Please find attached a draft final version of a letter to the Navy on their Parcel G Work Plan for the first radiological retesting effort at Hunters Point Naval Shipyard. This is the first work plan for the retesting efforts. It communicates our direction to move forward with a process for initiating field testing as soon as possible. The letter also provides direction to the Navy on increasing public participation, such as for the ongoing site-wide Five-Year Review (FYR) with regard to the development of Preliminary Remediation Goal calculator assessment for radionuclides.

Please provide any comments by COB, Wednesday, March 13, 2019. We plan to issue the letter by March 15, 2019.

Respectfully,
Angeles
